Parsed CSR Queries Update

Item	Date	CLEC	Query	Date	BST Response	NOTES
001	9/17/01	MCI/WCom	What are BST plans for providing this functionality via industry EDI and CORBA interface guidelines?	9/19/01	EDI interface does not offer pre-order. Parsed CSR will be offered via TAG, BST's CORBA interface.	
002	9/17/01	MCI/WCom	What are plans for upgrade to LSOG 5? Or will this version be a hybrid LSOG 4/5? Requirements document does not identify field usage, i.e., required, conditional, optional, prohibited, etc.	9/19/01	Parsed CSR will be offered in the most current version - LSOG 4. It will be available in LSOG 5 when implemented.	
003	9/17/01	MCI/WCom	Are field characteristics, i.e., alpha, numeric, alpha/numeric, and special between pre order identical to ordering requirements?	9/19/01	Data conversions made by CLECs when placing data from the CSR on an LSR will still need to be considered by the CLEC.	
004	9/17/01	MCI/WCom	Requirements document does not identify field usage, i.e., required, conditional, optional, prohibited, etc.	9/19/01	The CSR is a reference document.	
005	9/17/01	MCI/WCom	Requirements document does not identify field lengths.	9/19/01	CSR fields differ from LSR fields.	
006	9/17/01	MCI/WCom	Are field names for Pre Order identical to Order when definition and general usage are the same?	9/19/01	Field names on CSR may be similar to those on the LSR.	
007	9/17/01	MCI/WCom	In many instances the requirements document does not identify valid values applicable for specific fields, e.g., SATH, CITY, STATE, LASD, LATH, LASS, LALOC, etc. Are pre order values received in these fields to be populated exactly as received (i.e., with case sensitivity applied) to order as received in pre order CSR transaction?	9/19/01	Consult the BellSouth Business Rules determine if data format for LSR. (See item 3)	
008	9/17/01	MCI/WCom	Are field values contained in Pre Order CSR response transaction identical to order initiation requirements?	9/19/01	Field values on CSR may be similar to those on the LSR.	
009	9/17/01	MCI/WCom	If the end user's listed and service address is identical, will both be parsed out in response transaction? What if they are not identical, will sets of fields be populated?	9/19/01	See Assumption 1 on page 2 of the requirements document.	
010	9/17/01	MCI/WCom	If the end user's directory delivery address is identical to either the service or listed address,	9/19/01	See Assumption 1 on page 2 of the requirements document.

016	9/17/01	MCI/WCom	UR6776.0004. What are inquiry requirements? CCNA was recommended to be prohibited for response transaction.	9/19/01	If the data is provided on the CSR, it will be provided via Parsed CSR.

Subject: RE: need pre-order rules for Parsed CSR

BCCM:

Here are just a few of the critical pieces of info lacking in what BST has provided in support of Parsed CSR to date:

- * TXNUM is defined as required, but does not appear in the API document.
- * The valid values for-TXTYP are defined as "BellSouth suggested valid values".
- * TOS is defined as required for responses, but is not present in the API document.
- * There is no definition of how lists of information are related, e.g., there is a list of listed TNs and a list of Listed Name - How are these related?

These are just more examples of the poor quality of documents provided by BST to the CLEC community. This bad information increases CLEC costs, decreases CLEC efficiency and elongates the conversion window from BST to CLECs. Bottomline, end users will be negatively impacted.

Who in BST is responsible to review/compare your API docs with Business Rules to ensure they are in synch? When will BST provide updates to the Pre-Order rules?

Summary of Open PCSR Defect Workarounds

(February 21, 2002)

CR Number	Date Submitted	Date of Workaround*	Summary of Workaround

CR 0634	01/31/02	2/15/02	The CLEC should remove the hyphen before submitting their LSR (This will still result in an incorrect LSR)
CR 0635	01/31/02	2/15/02	Data is informational only, no workaround required
CR 0636	01/31/02	2/15/02	CLEC reformat the affected fields using the example in the defect change request
CR 0637	01/31/02	2/15/02	Obtain and review an unparsed record
CR 0638	01/31/02	2/15/02	Obtain and review an unparsed record
CR 0639	01/31/02	2/15/02	Submit LSR, if rejected resubmit

*** The CCP Defect process requires the publication of workarounds for defects classified as low impact within three business days.**

FLORIDA COMMISSION WORKSHOP 2-18-02

PRE-ORDER:

- WHAT IS A PARSED CSR?
- AS STATED IN TESTIMONY AND EX PARTE TO THE FCC, ITC^DELTACom DOES USE THE BELLSouth CUSTOMER SERVICE RECORD, TO POPULATE SOME ORDER INFORMATION FOR RESALE AND UNE-P NON- COMPLEX SERVICE REQUESTS.
- LEVEL OF FUNCTIONS IS NOT EQUAL TO BELLSouth RETAIL EXPERIENCE, EXAMPLE IS THE PENDING ORDER FLAG
- NO EDI PRE-ORDER TOOL EXISTS AT BELLSouth
- THE ITC^DELTACom SOFTWARE CAN NOT SUPPORT COMPLEX PRODUCTS, NOR GENERATE LISTINGS. EXAMPLES OF ORDERS NOT SUPORTED ARE CENTREX, ISDN, TRUNKS, EELS AND FACILITY BASED PRODUCTS.

THE INITIAL SOFTWARE DESIGN WAS TO CONVERT EXISITING RESALE CUSTOMERS TO UNE-P, A SIMPLE BILLING CHANGE WHICH WAS TO BE TRANSPARENT TO OUR CUSTOMERS. THE CSR WAS USED TO VALIDATE THE ADDRESS AND THE ENGLISH VERSION OF THE USOC'S USED TO MATCH TO AN ITC^D PRODUCT CODE. WE DO NOT USE USOCS AND FID'S OTHER THAN AS REQUIRED BY THE ILEC FROM WHICH SERVICES ARE BEING ORDERED AND OUR SYSTEMS DO NOT STORE.

BELLSouth's CURRENT VERSION OF PARSED CSR HAS 25 DEFECTS IDENTIFIED BY BELLSouth AS BEING OUTSTANDING. CRITICAL TO ITC^D IS THE HUTING DEFECT. ITC^D HAS CR 222 STILL OUTSTANDING, WHERE BELLSouth RETURNS "UNKNOWN USOC" ON ITS OWN CODE. CR 498 IS A DEFECT WHERE SOME CSR'S ARE DISPLAYED IN LENS BUT NOT IN TAG. I'LL ADDRESS LATE POSTING OF CSR'S IN MY ORDERING COMMENTS, HOWEVER MANY RECORDS ARE NOT CURRENT.

ORDERING:

SINCE FIRST QUARTER OF 2001, ITC^D HAS EXPERIENCED ISSUES WITH THE HUNTING. WORK AROUNDS HAVE BEEN USED AT THE EXPENSE OF ITC^D. SOME EXAMPLES OF CR'S ARE: 462 HUNTING NOT MATCH CSR, 606 REQ TYP M HUNTING DEFECT, WHICH WAS SUBMITTED BY BST AND PROCESSED AS AN EXPEDITED FEATURE "BECAUSE NEGATIVELY IMPACTING CLEC'S END-USERS AND THE BILL". 651 IS A CR FOR TRANSLATION OF HUNTING TO LSOG 4 FOR PARSED CSR. CARRIER NOTIFICATION OF 2-8-02 STATES THE HA TABLES WILL BE UPDATED 3-1-02 FOR RESALE AND UNE-P. BELL SOUTH HAS BEEN AWARE OF THE DEFECT SINCE THE SPRING UNE-P WORKSHOP, SEE ITEM 27. ITC^D HAS HAD TO CALL BECAUSE ORDERS FELL OUT FOR CLARIFICATION, CSR'S POSTED INCORRECT USOC BILLING QUANTITIES, OR CUSTOMER'S SERVICE WAS IMPROPERLY PROVISIONED. BELL SOUTH DOES NOT DISCLOSE ITS EDI LINKAGES, FOR EXAMPLE ITC^D HAD A MAP THAT IMPROPERLY SENT LOCNUM THAT REQUIRES HUNTING PAGE, WE WERE UNABLE TO FIND ANY DOCUMENTATION DISCLOSING THESE TYPE OF EDITS.

AS WE NOTED IN THE LA WORKSHOP, CSR'S ARE INCORRECT AND LATE IN POSTING. IN THE PAST WE SENT BST A LIST EACH WEEK FOR THEIR CORRECTION. FOLLOWING THEIR RESTRUCTURE OF THE ACCOUNT TEAM, WE WERE ADVISED THIS WAS NO LONGER AN ACCEPTED METHOD OF DOING BUSINESS. WE WERE REQUIRED TO CALL OUR CORRECTIONS (THEIR ERRORS) TO THE LCSC NO MORE THAN FIVE PER CALL. WE LATER WERE ABLE TO ESCALATE THE ISSUE AND HAVE SINCE RETURNED TO SENDING THE LIST. APX. 30% OF OUR CORRECTIONS ARE HUNTING RELATED.

METRICS:

OBSERVATION 146

BellSouth Florida OSS Testing Evaluation

Date: November 30, 2001**OBSERVATION REPORT**

KPMG Consulting has identified an observation as a result of the POP Functional Evaluation (TVV1).

Observation:

KPMG Consulting has experienced a server error that disables the 'Calculate Due Date' function while processing Local Service Requests (LSRs) through RoboTAG. (TVV1)

Background:

BellSouth developed RoboTAG as an electronic interface software that combines Telecommunication Access Gateway (TAG) with a front-end Graphical User Interface (GUI). Accordingly, Competitive Local Exchange Carriers (CLECs) should be able to use RoboTAG for all ordering and pre-ordering functions that are currently electronically enabled.

Prior to submitting an LSR through RobTAG it is necessary to calculate the due date. This procedure validates the desired due date populated on the request. Once the due date is validated the request may be submitted to BellSouth.

When calculating the due date in RoboTAG, KPMG Consulting has received server errors stating that the due date cannot be calculated for the related service request. The following service requests received this server error prior to submission, preventing the due date from being successfully validated:

PON	Ver	Date Submitted	Request Type (REQTYP)	Activity Type (ACT)	Line Activity (LNA)	The Server Error Message:
051021FPLK000016	1	11/06/01	Loop/Port (MB)	Conversion to LSP (V)	Conversion as is (W)	"50: Cannot calculate a due date for orders with multiple service addresses"
019011FPRN100026	0	11/06/01	Resale (EB)	Conversion as is (W)	Prohibited	

OBSERVATION 146

BellSouth Florida OSS Testing Evaluation

After receiving the error message listed above, a second attempt to calculate the due date was performed and generated a slightly different error message stating, "50: Cannot calculate due date. Due Date will be returned on the FOC. "

Impact:

CLECs rely on the 'Calculate Due Date' function in RoboTAG to accurately communicate to customers a date in which their related service will be provisioned. The inability to successfully calculate due dates for service requests may increase operating costs, decrease customer satisfaction, and require additional CLEC resources to research solutions.

* The volume data for TAG LNP in December is inaccurate --- prior months were averaging 5-6000 orders, in December only 632 orders were reported. Thus the % values for TAG LNP and TAG TOTAL in December are potentially inaccurate.
